Discover our Data Centers & Server Room power protection, precision cooling, and IT equipment racks for industrial applications, small businesses, and homes.

It is capable of handling various industrial-grade application scenarios, including peak shaving, demand management, renewable energy storage, and emergency backup power.

DCX HYDRO CDU 2 is a rack-based Coolant Distribution Unit designed to cool individual high-density server racks. This compact 4U CDU is equipped with unique immersion pumps and delivers over 170 ...

Thanks to unsurpassed reliability, efficient use of energy, cost-effectiveness, potential for expansion, and sheer power, the modular rack system offers stable data storage along with peace of mind for data ...

Providing reliable and cost effective power distribution, the Basic PDU offers IEC outlet grips, tool-less installation in server racks, color-coded outlet sections and a high operating temperature.

Compare 2025's top power distribution units for server racks. Discover features, scalability, energy efficiency, and reliability to optimize your IT setup.

The CHx200 is a rack-based CDU, built for the needs of today's most demanding HPC and enterprise server requirements. Capable of managing 200 kW of heat load in a remarkably small 4U of space, ...

For many data centers, liquid cooling offers better performance while reducing energy usage. However, better liquid cooling processes are key to sustainable deployment.

Get the rack PDU needed for your lab, data center or telecommunications operation. Enjoy reduced downtime, improved energy utilization and more.

200kW Industrial Server Rack for Distributed Energy

No matter your rack power requirements, whether average or extra high densities, Server Technology provides high-density rack PDUs designed to support compute-heavy applications.
