CPS has launched a 5 MWh battery energy storage system for the North American market, designed as a containerized solution with high energy density for utility applications.

The Reservoir Storage unit is a modular high density solution that is factory built and tested to reduce project risk, shorten timelines and cut installation costs.

Easily expandable using Standard Renewables" modular and string design, ensuring scalability. Remarkable energy density: up to 5 MWh within a single 20ft container.

Stem's Modular ESS is available in both AC- and DC-coupled architectures as illustrated in the figure below:

5MW Modular Energy Storage Sheet for Distributed Energy Storage in North America

Fully integrated system with minimum on-site installation and commission efforts High energy density: 5 MWh in one 20ft container Multiple-point electrical linkage measures Easy to expand with CPS's ...
