Are 'rogue' communication devices hidden inside solar power inverters?

In a discovery that has sent shockwaves through the cybersecurity community, U.S. energy officials have found undocumented 'rogue' communication devices hidden inside solar power inverters imported from China.

Are undocumented communication devices hidden in Chinese-made solar inverters?

This investigative article exposes the discovery of undocumented communication devices hidden in Chinese-made solar inverters, creating unprecedented vulnerabilities in global power grids.

Why are Chinese tech makers banned from 5G towers?

Chinese tech makers have already been banned from other parts of America's essential infrastructure, including 5G towers, over similar concerns that they may facilitate espionage or sabotage. It appears similar restrictions may be in the pipeline for solar infrastructure at a time when the country's capacity should be expanding.

Could rogue communication devices destroy the power grid?

Using the rogue communication devices to skirt firewalls and switch off inverters remotely, or change their settings, could destabilise power grids, damage energy infrastructure, and trigger widespread blackouts, experts said. 'That effectively means there is a built-in way to physically destroy the grid,' one of the people said,

Chinese tech makers have already been banned from other parts of America's essential infrastructure, including 5G towers, over similar concerns that they may facilitate espionage or ...

I'm really pulling my hair out at the minute and have spent hours trying to solve my inverter to battery communication. Installed Solis RAI-3K-48ES-5G inverter and bought a Pylontech ...

Recently, my Eero 6+ mesh wifi system performed a firmware upgrade and now I am getting communications errors. I did log into the Sunny Places app and have been able to connect to ...

This investigative article exposes the discovery of undocumented communication devices hidden in Chinese-made solar inverters, creating unprecedented vulnerabilities in global power grids.

5g solar-powered communication cabinet proxy error

U.S. energy-sector forensic teams have begun disassembling Chinese-manufactured solar inverters and grid-scale batteries after discovering undocumented 4G/LTE modules and other wireless ...

Photovoltaic inverter communication abnormalities are like having a Ferrari with a broken radio - the core functionality works, but you're missing crucial information to optimize performance.

U.S. energy officials have launched an investigation after discovering unauthorized communication equipment embedded within Chinese-manufactured solar power inverters connected ...

U.S. energy officials have found "unexplained" communications equipment inside some Chinese-made inverter devices, according to a report by Reuters published Wednesday.

Undocumented communication devices have been discovered inside solar inverters and batteries manufactured in China, according to two sources familiar with the matter.

LONDON, May 14 (Reuters) - U.S. energy officials are reassessing the risk posed by Chinese-made devices that play a critical role in renewable energy infrastructure after unexplained...
