What is Addis power?

Addis Power is one of the largest exhibition exclusively on power,energy and lighting,which will be held at Millennium Hall. Ethiopia has abundant renewable energy resources and has the potential to generate over 60,000 megawatts (MW) of electric power from hydroelectric,wind,solar and geothermal sources.

Why is Ethiopia a central hub for regional energy trade?

Its proximity to neighboring borderspositions Ethiopia to become a central hub for regional energy trade,fostering deeper ties across the Horn of Africa. Guided by the principle of Medemer,the government remains committed to transforming Ethiopia's vast natural endowments into shared resources.

Why is Ethiopia experiencing energy shortages?

Despite Ethiopia's huge energy potential,the country is experiencing energy shortages as it struggles to serve a population of over 100 million people and meet growing electricity demandwhich is forecast to grow by approximately 30% per year. WHY EXHIBIT?

Addis Ababa, January 31, 2026 (FMC) -- Ethiopia officially inaugurated the Aysha-II Wind Power Project today, marking a significant milestone in the country"s efforts to diversify its renewable ...

Ethiopia has abundant renewable energy resources and has the potential to generate over 60,000 megawatts (MW) of electric power from hydroelectric, wind, solar and geothermal sources.

The Addis Ababa Energy Storage Project Construction stands as a cornerstone initiative in Ethiopia"s push toward energy security. With 65% of its population lacking reliable electricity access, this ...

Addis Ababa, January 31, 2026 -- Ethiopia is making notable strides in its energy sector by emphasizing regional integration and cross-border connectivity. At the inauguration of the Aysha II ...

The Addis Ababa Wind and Solar Energy Storage Power Station represents Ethiopia"s clean energy ambitions. By prioritizing ethical land acquisition and community collaboration, this project could ...

# Addis ababa power wind power energy storage project

Choosing the right location for energy storage systems in Addis Ababa isn't just about finding empty land - it's like solving a three-dimensional puzzle. You need to balance grid connectivity, environmental ...

Addis Ababa, January 31, 2026 (ENA) -- Ethiopia reached a defining milestone in its journey toward energy sovereignty today with the official inauguration of the Aysha-II Wind Power Project in ...
