Who is microgrid energy?

At Microgrid Energy, we design and manufacture high-performance solar energy storage systems for Australian homes and businesses. Our advanced lithium battery solutions are built for reliability, safety, and seamless integration with solar technology -- helping customers take control of their energy and reduce reliance on the grid.

What is a microgrid inverter?

Our inverters are the heart of every Microgrid Energy system-- engineered to convert solar power into clean, usable energy with maximum efficiency and reliability. Designed for seamless integration with our lithium battery storage units, our inverters support grid-tied, hybrid, and off-grid applications.

Why should you choose a microgrid energy system?

Proudly engineered for Australian conditions, our systems support a cleaner, smarter, and more sustainable energy future. Our inverters are the heart of every Microgrid Energy system -- engineered to convert solar power into clean, usable energy with maximum efficiency and reliability.

Unleash peak performance and unparalleled security with our Air-cooled Energy Storage System. This modular powerhouse seamlessly integrates AI-powered intelligence for optimized operation and ...

Product Features: Standardized structure design, menu-type function configuration, photovoltaic charging module, a parallel off-grid switching module, power frequency transformer, and other ...

Based in Melbourne, we provide wholesale solar battery storage systems built to meet Australia's unique energy needs, climate conditions, and compliance standards. Our products are TÜV tested, CEC ...

With its scalable and anti-corrosion capabilities, Delta's battery system can meet project requirements of varying scale and is suitable for various environmental conditions, making it an ideal solution for grid ...

The ELECOD Outdoor Cabinet Energy Storage System (Air-Cooled) is a highly efficient and scalable energy storage solution, designed for use in microgrid scenarios such as commercial, industrial, and ...

Australian microgrid user outdoor energy storage cabinet 1200mm deep

Our energy storage systems are compatible with storing energy from renewable sources, making them an ideal solution if you want to reduce fuel consumption of a diesel generator, add reliability to a ...

Suitable for outdoor or indoor projects, our Slimline Range has a compact footprint ideal for smaller spaces. Designed and manufactured in Australia, the range brings a fresh modern look to energy ...

Designed specifically for large - scale industrial and commercial microgrids. It can deliver a battery voltage of 768V, a grid - connected output of 320kW, and enables multi - power coordination among ...

This outdoor cabinet is a highly integrated energy storage system. Its versatile arrangement allows for ease of installation and maintenance. Ideal solution for: XCEL TECH Pty Ltd is a leading provider of ...

With a rated capacity of 230.4 kWh, it is an ideal choice for various applications, including power stations, micro power grids, grid frequency modulation, peak load shifting, and backup power ...
