How does Bess work in Brazil?

In May 2024, the Brazilian Ministries of Development and of Science and Technology issued an ordinance to provide tax and non-tax incentives for the production of BESS in Brazil. The ordinance establishes the concept of a 'basic production process' and a points-based system for lead and lithium batteries.

Can Brazil be a big battery storage country?

With well-designed policies and regulations, Brazil has significant potential to follow in the footsteps of jurisdictions like California and Chile for large-scale battery storage, Germany for distributed and large-scale storage, and Australia for both pumped hydro and large-scale battery systems.

What percentage of solar energy is distributed in Brazil?

As of 2023, PV energy secured its position as the second most substantial contributor in the energy matrix, representing 14.3 % of the total portion. It's worth highlighting that PV solar systems encompass 99.9 % of distributed generation (DG) in Brazil.

What businesses are deploying Bess in Brazil?

A few other businesses exist in Brazil as well, such as Micropower, Aldo Solar and YouOn, for instance. The deployment of BESS can take various forms, and business initiatives may vary. To address this, the National Electric Energy Agency of Brazil (ANEEL) has identified a regulatory gap and initiated a three-phase roadmap.

For Brazil, the 2026 auction could serve as a watershed moment -- defining not just how storage integrates into its National Interconnected System, but how the country approaches reliability ...
