They feature power supply, distribution, and protection equipment as well as radio systems and passive or active cooling. Contact us today to learn about all the options and to find a solution that is right for ...

Choose from 50kVA modules for a power range of 300KVA to 500KVA. It's a green, reliable solution with high efficiency (up to 95%). Ideal for medium to large data centers.

The UPS system is designed with modular architecture, where each module operates independently and contains its own components, including power converters, inverters, and battery systems.

GVSBPIT50 - Galaxy VS Maintenance Bypass Cabinet with Input Transformer 30-50kW 480V or 600V In, 208V Out.

The brand-new Delta Modulon DPH series UPS 50-300/500/600 kVA achieves the industry's leading power density of 50kW per module, offering the smallest footprint and best space utilization.

This heavy-duty enclosure securely houses a Stand By Power Supply and three (3) batteries along with equipment and cable required for fiber optic conversion and/or distribution.

Supports optional communication cards that allow remote access via the HTTP(S), SNMP, MODBUS TCP/IP, Modbus RTU and BACnet IP protocols. Manage your power devices in your physical or virtual ...

Maintenance bypass cabinet with output transformer. The maintenance bypass isolates the UPS completely during service operations. The output transformer converts the 480 V output of the UPS ...

Our solution was built to meet the requirements of CSA and was then tested and approved once it arrived in Canada as it was not possible to have the testing done in the UK.

Canada Communication Power Supply Cabinet 50kW

Supports self-consumption, peak-valley arbitrage, backup power, and other various scenarios. Max. DC input voltage. *The data sheet will be changed according to actual situation without prior notice.
