Canberra is taking bold steps towards a sustainable future, with recent initiatives set to transform how we generate, store, and use energy. Here's what you, as a Canberra resident, need to ...

The large-scale battery will deliver at least 250 megawatts of power. This is enough stored renewable energy to power one-third of the city for two hours during peak demand.

Iconic national attractions; riding Mount Stromlo's bike trails; sipping our cool-climate Shiraz. Canberra offers the peak experience. It's the best of Australia, brought together for you.

Designed to tackle the intermittency of wind and solar power, this pumped hydro initiative could store enough electricity to power 200,000 homes for 8 hours--equivalent to keeping Sydney Opera House ...

Energy Storage is critical for ACT's 100% renewables and net-zero target. Helps to put downward pressure on electricity price paid by ACT consumers. Reduces the need for electricity network ...

The 250-megawatt (MW), 500 megawatt-hour (MWh) battery energy storage system (BESS) will store enough renewable energy to power one-third of Canberra for two hours during peak demand periods, ...

We've rounded up just some of the best things to do in Canberra for your next visit, giving you 31 reasons to extend your stay and really give yourself over to the capital's many charms. 1. Cycle or ...

The objective was to expand renewable energy storage and future-proof Canberra's energy supply. The project aims to deliver the next stage of the Big Canberra Battery by establishing a large-scale ...

Canberra energy storage solar power station

ITP Renewables was engaged by ECU Energy to provide expert planning support throughout the development and delivery phases of the 250 MW Big Canberra Battery system, which will begin ...
