What is the Big Canberra battery?

The Big Canberra Battery will play a crucial role in managing peak electricity use demand and in supporting the ACT's transition to a more sustainable energy future. For technical specifications of our work on the Big Canberra Battery, or to discuss engaging us on similarly ambitious battery storage projects, please contact our team.

Does solar energy storage make economic sense in Canberra?

Whether or not solar energy storage makes economic sense for your home in Canberra depends first and foremost on whether or not you already have a solar system, and if you do whether or not you have access to a Territory-supported solar feed-in tariff.

Which energy retailers are launching in Canberra?

The latest retailer to launch in the nation's capital is Nectr, a brand that claims to be all about simple low prices and a choice that's better for the environment. It has two market offers in Canberra with no exit fees. Origin Energy now has a wide range of energy products in the ACT, with a number of market offers.

Will big battery power a third of Canberra households in 2025?

Canberra Times: ground breaking ceremony, plugging in profits from a big battery. ITP Renewables was engaged by ECU Energy to provide expert planning support throughout the development and delivery phases of the 250 MW Big Canberra Battery system, which will begin powering one-third of Canberra households from 2025.

The Big Canberra Battery will give the community energy security by keeping their power running, while helping reduce emissions. The large-scale battery will deliver at least 250 megawatts ...

The Canberra Compressed Air Energy Storage (CAES) Project represents a breakthrough in large-scale energy storage, addressing one of renewable energy's biggest challenges: intermittency.

YES Group kicks off 2025 by energising Stage 1 of a 15 MWh battery storage system in Canberra, and a 5 MW solar farm in South Australia while transitioning the company from contracting to build sub-5 ...

Canberra new energy storage equipment manufacturer

Naturgy has successfully connected its first battery storage facility in the world to the grid, a historical milestone for the company in the renewables business.

Energy storage developer Eku Energy has started constructing a 250MW/500MWh battery energy storage system (BESS) in Canberra, the Australian Capital Territory (ACT). A groundbreaking ...

The Big Canberra Battery will play a crucial role in managing peak electricity use demand and in supporting the ACT's transition to a more sustainable energy future.

Energy storage developer Eku Energy has started constructing a 250MW/500MWh battery energy storage system (BESS) in Canberra, the Australian Capital Territory (ACT). A ...

Since 2012, we have contributed over 4.5 GW of renewable energy & storage assets and invested over \$7 billion towards Australia's energy transition. The Capital Battery, proposed in south east ...

Zest Energy is an Australian company specialising in Renewable Energy, Hydrogen Production and Energy Storage solutions. Zest can assist end users to select and procure the right equipment and ...

Eku Energy has finalized financing for its 250 MW/500 MWh energy storage system in Canberra, contributing to the energy security of the ACT and its ambitious climate goals.
