What is the Big Canberra battery project?

The Big Canberra Battery project will provide renewable energy security across the electricity grid, help the ACT grow its renewable energy sector, provide more local employment opportunities, and deliver a positive financial return for the Territory.

Will big battery power a third of Canberra households in 2025?

Canberra Times: ground breaking ceremony, plugging in profits from a big battery. ITP Renewables was engaged by Eku Energy to provide expert planning support throughout the development and delivery phases of the 250 MW Big Canberra Battery system, which will begin powering one-third of Canberra households from 2025.

Will Canberra's energy supply be future-proofed?

The ACT Government is future-proofing Canberra's energy supply by expanding its renewable energy storage with a new partnership with global specialist energy storage business, Eku Energy, launched by Macquarie's Green Investment Group.

Where can I find more information about the Big Canberra battery?

More information about the Big Canberra Battery is available on the Everyday Climate Choices website. The ACT Government's partnership with Eku Energy to develop a grid-scale battery at Williamsdale is a significant step in the delivery of the Big Canberra Battery ecosystem.

The project will support 150 local jobs in the emerging clean energy sector. Battery storage technology is a key component of the ACT's net-zero emissions future.

Over the next year, three new community-scale battery energy storage systems (BESS) will be deployed across Canberra to optimize solar energy usage, stabilize grid demand, and ...

Octopus' commitment to build the Blind Creek project east of Canberra is the first final investment decision in large-scale renewables since the June quarter.

Explore Canberra's bold microgrid and solar battery push -- community and grid-scale storage, peak demand

Canberra solar energy storage investment project

reduction and renewable energy solutions with expert solar support.

The objective was to expand renewable energy storage and future-proof Canberra's energy supply. The project aims to deliver the next stage of the Big Canberra Battery by establishing a large-scale ...

ITP Renewables was engaged by Eku Energy to provide expert planning support throughout the development and delivery phases of the 250 MW Big Canberra Battery system, which will begin ...

The ACT Government is future-proofing Canberra's energy supply by expanding its renewable energy storage with a new partnership with global specialist energy storage business, Eku Energy, launched ...

Designed to tackle the intermittency of wind and solar power, this pumped hydro initiative could store enough electricity to power 200,000 homes for 8 hours--equivalent to keeping Sydney Opera House ...

The 250 megawatt/500 MW hour Williamsdale battery energy storage system located 35km south of Canberra will store enough renewable energy to power one-third of the capital for two ...

Located 32 km north-east of Canberra, the project comprises a 300 MW solar farm and 243 MW/486 MWh of co-located battery storage, using DC-coupled hybrid technology to optimise ...
