How much does a Chad electricity kit cost?

Each kit, with a value of \$100, is sold for \$20. The kits provide home lighting and phone charging and will therefore be supplying electricity to an estimated 6 million people in Chad. Access to electricity is transforming the daily lives of Chadian households.

How much does a solar kit cost in Chad?

As part of the implementation of the Chad Energy Access Expansion Project (PAAET) - part of the Mission 300 initiative - 145,000 solar kits are being distributed at subsidized rates to households across the country's 23 provinces. Each kit, valued at \$100, is sold for the equivalent of \$20.

How will solar power benefit Chadians?

The device makes it possible to light homes and charge phones, thus will provide access to electricity to about 6 million Chadians. In rural regions, the deployment of standalone solar systems will allow to supply clean and dependable energy to numerous households. Electricity also plays a critical role in enhancing health and education services.

Why is electricity important in Chad?

Electricity also plays a critical role in enhancing health and education services. At night in the Bébalem market, located in the Logone Occidental province in southern Chad, most shopkeepers close for the day. Denis Tarlembaye uses lamps inside and in front of his shop, making it one of the few that remain illuminated and drawing several people.
