Every solar panel and battery connected to the U.S. energy grid relies on a device few people ever consider: the power inverter. In May of 2025, U.S. experts found undocumented ...

Cellular radios and other undocumented devices were found in solar inverters and batteries. The transition to clean energy without sufficient domestic manufacturing options has made ...

U.S. energy-sector forensic teams have begun disassembling Chinese-manufactured solar inverters and grid-scale batteries after discovering undocumented 4G/LTE modules and other ...

U.S. energy officials are reportedly reassessing the security risks posed by Chinese-made components in renewable energy infrastructure after discovering hidden communication ...

For months, experts examining renewable energy equipment imported from China have been quietly finding rogue components in solar inverters and large batteries, two people familiar with ...

However, rogue communication devices not listed in product documents have been found in some Chinese solar power inverters by U.S experts who strip down equipment hooked up to ...

U.S. energy officials have launched an investigation after discovering unauthorized communication equipment embedded within Chinese-manufactured solar power inverters connected ...

Undocumented communication devices have been discovered inside solar inverters and batteries manufactured in China, according to two sources familiar with the matter.

In a shocking revelation that has sent ripples through the cybersecurity and renewable energy communities, security experts have discovered undocumented communication ...

China s first solar-powered communication cabinet battery

Over the past nine months, undocumented communication devices, including cellular radios, have also been found in some batteries from multiple Chinese suppliers, one of them said. ...
