UNSW targets 1,000GWh of energy storage in Australia by 2050, ensuring a resilient, sustainable energy system for a healthy future. View our storage technologies.

Sites near some of Australia's largest coal-fired power stations are being assessed for their potential to house giant domes to stash clean energy.

Australia is leading the global battery storage boom with AUD 2.4B invested in Q1 2025. Discover how big batteries are replacing coal, stabilizing the grid, and driving the nation's clean ...

Analysts predict coal will provide less than 30% of electricity by 2026, making storage crucial for a cleaner grid. Federal and state policies have greatly helped the battery boom. Programs ...

NSW is conducting a series of auctions and tenders that have already agreed contracts with multiple battery storage projects, including three 8-hour batteries, one pumped hydro project and ...

Australia's New South Wales government has approved plans for a 500MW/2,000MWh battery energy storage system (BESS) being developed by energy generator-retailer EnergyAustralia.

Currently storage of electrical energy in Australia consists of a small number of pumped hydroelectric facilities and grid-scale batteries, and a diversity of battery storage systems at small ...

Australian utility Origin Energy revealed today (25 July) that it has approved the second stage of the Eraring battery energy storage project in New South Wales, Australia. This stage will ...

On 31 May 2023, Akaysha Energy began construction on the battery storage system at the Munmorah site. Construction for the project was completed in October 2024 and it is now ...

Coal-to-electricity energy storage device in sydney australia

Australia has a massive pipeline of grid-scale battery energy storage projects. 16.5 GW of new battery projects could arrive in the NEM in the next 3 years.
