---

Signed by Gov. Gavin Newsom at the end of September, it paves the way for the California Energy Commission to require that new electric vehicles be "bidirectional" -- meaning that ...

Hager Group develops and markets innovative solutions that allow electric vehicles to be used as storage for excess solar energy and feed this energy back into the home or public grid as ...

Duke Energy's Community Energy Storage project is highlighting how the available value streams for an energy storage system are highly dependent on the location of the system.

This piece offers an in-depth examination of the integrated solar energy storage and charging infrastructure, serving as a valuable resource for enhancing the stability of energy supply ...

In contrast to stationary storage and generation which must stay at a selected site, bidirectional EVs employed as mobile storage can be mobilized to a site prior to planned outages or arrive shortly after ...

Instead of relying solely on individual batteries, homeowners now connect their solar storage systems into a neighborhood-wide network, creating a resilient power grid that reduces costs ...

Where This Tech Shines: Unexpected Applications While everyone talks about home solar systems, here's where bidirectional storage is making quiet revolutions:

This article explores the components, benefits, and innovations in home energy storage systems, emphasizing how Bidirectional power supplies like the BIC-2200 can revolutionize energy ...

A bidirectional charger speaks both languages fluently, converting back and forth as needed. When the grid has cheap, abundant electricity (usually at night), the system stores it.
