Who makes outdoor Telecom cabinets?

Since 1989, we've manufactured outdoor telecom cabinets in America's Heartland, providing telecommunications companies, utilities, and network operators with BABA-compliant solutions that protect critical equipment from the harshest environmental conditions.

Why are 42U cabinets becoming more popular?

Here's what's driving this growth: 1. AI and Machine Learning: AI farms need massive computing power. Therefore, they need bigger cabinets. 42U cabinets are becoming more popular than ever. 2. 5G Technology: 5G networks require sophisticated edge computing infrastructure. This means more network cabinets in more locations.

How much does a 42U cabinet weigh?

A 42U cabinet filled with equipment can weigh over 3,000 pounds. Typical office floors are designed for about 40 to 50 pounds per square foot. A 42U cabinet might exceed that. You might need structural reinforcement. This is especially important if you're putting it on an upper floor of a building.

Can a 42U rack extension be used in a cabinet?

As an alternative to the 180mm rack extensions, the 42U Onyx racks also support an 85mm slim extension. The slim extension can be installed at the front or rear of the cabinet (or both front and rear). 42U racks only: The 85mm slim extension is only supported in the 42U rack cabinets, and only comes in Onyx (black) color.
