Situated in the Ignié Special Economic Zone (SEZ), the project will generate 55 MW from a hybrid solar plant and an additional 10 MW from a biomass facility. Set for completion within 18 ...

Our study focuses on Nuru, a privately owned Congolese energy supplier that has recently taken aim at expanding electricity access in eastern DRC using decentralized solar mini grids with ...

A solar minigrad in a Goma neighborhood where almost everyone lacked access to electricity just five years ago is offering a flicker of hope despite widespread poverty and the city's violent takeover by ...

NURU develops and operates commercially-viable isolated solar-hybrid "metrogrids" (utility-scale urban mini-grids) that provide reliable, affordable and clean energy in the Eastern region of the Democratic ...

Providing solar energy solutions for households and businesses is crucial to incorporating more Congolese people into electrical grids, but many in poorer, remote regions in the DRC also ...

This article explores the rural electrification challenge, provides an overview of solar mini-grid technology, highlights key companies and notable projects, discusses government policies and ...

In several Goma neighbourhoods where almost nobody had electricity just five years ago, a small solar network is offering a flicker of hope despite widespread poverty and the city's violent ...

Hydro and solar powered mini-grids have the largest potential to accelerate electrification rates. The DRC has 100GW of hydro potential (the greatest in Africa), of which only 2.5GW have been developed.

From remote mining camps to vital telecom infrastructure, Congo's outdoor energy storage market is powering sustainable development. By combining solar generation with smart storage, businesses ...
