-----

On the sun-drenched plains near Benkovac in Zadar County, a transformative project is taking shape. Croatia's largest solar power plant, SE Korlat, is set to redefine the nation's energy ...

Hrvatska elektroprivreda (HEP) is the national energy company charged with production, transmission and distribution of electricity. At the end of 2022, the total available power of power plants on the territory of the Republic of Croatia was 4,946.8 MW, of which 1,534.6 MW in thermal power plants, 2,203.4 MW in hydropower plants, 986.9 MW in wind power plants and 222.0 MW i...

Croatia experienced accelerated growth in renewables over the past year, yet the sector faces critical bottlenecks. By the end of 2024, the country had reached 3.8 GW of installed renewable ...

Croatia crossed the 1 GW milestone in May 2025 and, if current trends persist, could reach 1,290 MW by December 2025. The self-supply sector, particularly households and public ...

The groundbreaking ceremony for Croatia's largest photovoltaic power project, to be constructed by Chinese companies, was held Thursday in Korlat.

"Croatia's National Energy and Climate Plan (NECP) aims to install 2,382 MW of solar capacity by 2030. With around 1,255 MW already in operation, Croatia has reached roughly half of its ...

At the end of November 2024, Croatia had 25,406 solar power plants on the distribution grid, with a total capacity of 776 MW. The country achieved growth of 60% since the end of 2023 in ...

Croatia is expected to surpass 1 GW of solar power by 2025, driven by a significant increase in installations and supportive policies. The expansion is part of the country's broader ...

In May 2023, Acciona Energy announced the construction of the largest solar power plant in Croatia. The new power plant will be spread over three million square meters of rugged state land and will ...

## Croatia solar power system

In addition to investing in renewable sources, HEP is also investing in strengthening the distribution and transmission network in order to accept production from an increasing number of renewable sources ...
