Trading of electricity, hydrogen, and fossil fuels between Central Asian countries and with rest of world (electricity trade limited by current and planned transmission grid)

We have senior electrical industry experts with strong ...

Adopting the unique modularized design of switching power supply, N+1 backup. Ultra-wide voltage input range, strong grid applicability, and can be used in places with relatively harsh environments.

Main Products: Power Transmission and Distribution Transformer, Box-Type Complete Substation, High and Low Voltage Distribution Cabinet, Liquid-Cooled Energy Storage Cabinet, Power Line Accessories

It is ideal for upgrading legacy DC power plants at macro cell sites to support the increasing power requirements of 5G applications.

GZDW series is suitable for substations, power plants, industrial and mining enterprises, electrified railways and high-rise buildings of different voltage levels. It can be used as operating power and ...

It combines high-frequency switching technology and computer technology, and the power output unit is designed by modularization (N+1). The display operation unit adopts the new touchable interface ...

GZDW series is suitable for substations, power plants, industrial and ...

The microcomputer-controlled DC power supply cabinets are suitable for unattended, remotely monitored power plants, substations, and other industries requiring DC power.

We have senior electrical industry experts with strong technical development ability, mature workers' technology, complete set of production and testing equipment, reliable quality of components and ...
