This project marks the first off-grid installation in Djibouti featuring LONGi's latest Hi-MO X10 modules, built on advanced back-contact (BC) technology to deliver unmatched reliability and ...

It showcases the integration of solar panels, batteries, and the electric grid, demonstrating how these components work together to provide uninterrupted power supply.

Unlocking private sector investment in the sustainable off-grid sector (solar based mini-grids and SHS) for increased access to reliable and affordable electricity to peri urban and rural areas of Djibouti.

Taking advantage of the highest annual wind speeds in Africa, the plant significantly boosts Djibouti's renewable energy generation and decreases its reliance on imported electricity from Ethiopia.

JinkoSolar today announced it has delivered a 1.1MWh BESS for Hybrid Off-grid PV/DG System in the Republic of Djibouti, Horn of Africa, Ethiopia to the southwest, for the electrification of rural communities.

Featuring lithium-ion batteries, integrated thermal management, and smart BMS technology, these cabinets are perfect for grid-tied, off-grid, and microgrid applications.
