These projects include a variety of storage methods such as Li-Ion batteries, flow batteries and pumped hydro storage, which releases water stored at height to turn turbines, creating...

Ofgem has confirmed that 77 LDES projects, totalling 28.7 GW, have passed the first eligibility stage under its new cap and floor scheme. Of these, 71 projects (24.5 GW) are expected to ...

With the current UK government promoting schemes to help the rollout of energy storage in the coming years, the future of BESS in the UK remains an exciting sector with many opportunities ...

The agreement adds to EDF's growing portfolio of battery storage projects across the UK and strengthens its role as a leading partner in the transition to cleaner, more flexible energy.

This article delves into the key features of energy cooperatives in the UK, emphasizing their vital role in promoting renewable energy, fostering local engagement, and contributing to the ...

In this blog, we'll explore the top 7 battery energy storage system projects in the UK for 2025. We'll look at each project's capacity, project cost, current status, and how it supports the broader shift to clean ...

From the caverns of Teesside and the reservoirs of Scotland to futuristic cryogenic tanks near Manchester, the UK is assembling a flexible, secure and low-carbon energy storage landscape.

Battery storage is at the heart of the UK and Ireland's transition to clean power. Our battery storage sites will provide up to 3GW of flexible capacity to accelerate the transition to a net zero future.

Several projects are currently under development and with some expected to be operational by 2030, and the introduction of an investment support scheme will help deliver them.

Does the uk and energy have any cooperative energy storage projects

This post investigates the state of the UK battery storage pipeline, year-to-date figures and an insight into the appetite to develop over time. Battery storage is essential for providing the ...
