This kind of close collaboration from project start to finish ensures that the solutions match the needs of the schools and their communities. #EnergyTransition #CleanEnergy #EnergyStorage #Microgrids ...

Explore how Dominica schools are embracing solar microgrids for energy resilience, and their transformative impact on community planning and disaster preparedness in the Caribbean.

Construction has started on the first major solar-plus-storage project in the Dominican Republic, which features a 24.8MW/99MWh battery energy storage system (BESS).

The Dominica Schools Microgrid Project serves as a proof point for how solar and storage systems can preserve community vibrancy by bolstering energy resilience amid intensifying ...

The commissioning of a 6 MW / 6 MWh Battery Energy Storage System (BESS), installed at the DOMLEC facility in the Fond Colé area, is nearing completion. Installation is already finished, ...

The project scope includes the installation of a rooftop solar PV system and a battery energy storage system (BESS) at each school integrated with the electrical loads in the two schools.

The Dominica Schools Microgrid Project serves as a proof point for how solar and storage systems can preserve community vibrancy by bolstering energy resilience amid intensifying...
