It's important to note that living off the grid in Germany, like in any other country, requires careful planning, research, and adherence to relevant laws and regulations.

OverviewGovernmental policiesHistoryStatisticsCompaniesSee alsoExternal linksGermany introduced its feed-in tariff in 2000 and it later became a model for solar industry policy support in other countries. As of 2012, the feed-in tariff costs about EUR14 billion (US\$18 billion) per year for wind and solar installations. The cost is spread across all rate-payers in a surcharge of 3.6 EURct (4.6 ¢) per kWh (approximately 15% of the total domestic cost of electricity). On t...

Germany gets less sun than the entire continental US, and yet almost a fifth of its electrical generation was done by solar power in 2025.
