How much do solar panels cost in Malaysia?

The first and most significant expense when installing solar panels is the upfront cost of the system. This includes solar panels, an inverter, mounting hardware and installation fees. On average, the cost of a solar panel system in Malaysia is between RM15,000 to RM40,000 depending on the size of the system, which is measured in kilowatts (kW).

Can You DIY solar panels in Malaysia?

No. Installing a home solar system by doing-it-yourself might be appealing, but several factors discourage DIY solar panel installation in Malaysia: Solar panels in Malaysia are not readily available to the public. Procuring the required equipment may be challenging and could lead to higher costs and logistical hurdles.

Should you invest in solar panels in Malaysia?

One of the key factors to consider when investing in solar panels is the return on investment (ROI). ROI refers to the time it takes to recoup your initial investment through savings on your electricity bills. In Malaysia, depending on your energy consumption, system size, and government incentives, you can expect an ROI within 6 to 10 years.

Do you need a battery to install solar panels in Malaysia?

If you or your household are at home most of the day -- running appliances, air-conditioning, or other devices between 9 am-6 pm -- then a battery isn't essential. Your solar power will be used directly as it's generated, giving you great savings without the extra cost of battery storage. What is the cost of solar panel installation in Malaysia?
