How can industrial networks be developed in the Yangtze River Delta?

This process can be guided by regional initiatives such as the Yangtze River Delta Industrial Transfer Demonstration Zones and the Chengdu-Chongqing Advanced Manufacturing Collaboration Zone, supporting the formation of multi-layered and multi-centered industrial networks.

Can the Yangtze River economic belt perform better?

“There is no doubt that the Yangtze River Economic Belt has been among the best-performing regions, either in terms of economic growth or environmental protection. The only question is how this best-performing region can perform even better,” he said.

How many provinces are in the Yangtze River basin?

The YREB crosses nine provinces and two directly administered municipalities. It accounts for over 40% of the population, 40% of freshwater resources, and 45% of the country's economic output. Growth in the middle and upper reaches of the Yangtze River Basin (YRB) lags that of the coastal areas.

Is the Yangtze River Delta a good place for Innovation?

Currently, the Yangtze River Delta demonstrates strong technological spillover and industrial coordination capacities, while the middle and upper reaches lag behind in innovation diffusion and industrial upgrading. Bridging these gaps requires enhancement of regional linkages and innovation ecosystems.

Our research aims to enhance scholarly understanding by conducting a thorough quantitative investigation of ID and HQDMI levels in YREB and examining their coupling and coordination dynamics.

Based on panel data at the prefecture-level city scale from 2011 to 2022, this paper explores the spatiotemporal patterns and driving factors of the coupling coordination between DTI ...

This book focuses on the level of industrial synergy development of the Yangtze River Economic Belt in China.

Hybrid Type of Communication Power Supply Cabinet in Yangtze River Economic Belt

The Yangtze corridor is emerging as the world's largest clean-energy trade route, powered by HVDC, solar, and battery-electric vessels.

This study aims to explore the impact of digital technology innovation on energy efficiency and energy intensity, and further provide new insights for addressing emerging challenges ...

The latest vision put forward by President Xi Jinping on the high-quality development of the Yangtze River Economic Belt has set the stage for the region to continue leading the way in the ...

The article selects panel data from 11 provinces of the region from 2004 to 2020 and constructs a spatial economic model and a threshold effect model to investigate the impact of energy ...

The YREB crosses nine provinces and two directly administered municipalities. It accounts for over 40% of the population, 40% of freshwater resources, and 45% of the country's economic output. Growth in ...

The results show that the development of digital infrastructure significantly improves energy efficiency, and this effect remains robust after a series of verification tests. The impact is ...

Based on panel data for 106 cities during the period of 2011-2020 in the Yangtze River Economic Delta, in this study we investigated the impact of digital infrastructure on economic resilience.
