USB-C is (I believe) limited to 100W. Dell's 5515 (Ryzen Edition) uses a Dell 180W/240W AC-DC adapter and doesn't support USB Power Delivery. The USB Type-C port only operates with ...

I know Dell bundled the best charger suited for the machine but I was wishing for something smaller that I can carry easily, especially since I move a lot for work and the battery life is abysmal.

I would like to get a power adapter for my Dell G15 5510 that is smaller than the 240W power adapter that came with it. The one that came with it is 7.75" (19cm) x 3.75" (9cm) x 1" (2.5cm). ...

I have an old XPS with discrete GPU that came with a 130-watt power adapter, but 90-watt power adapter was also listed as an option. If I connect the 90-watt power adapter, I get a ...

Hey guys! I'm pretty happy with G15 (5800H + 3060) so far, but I really hate carrying around the massive 230w power brick. I was thinking of getting a lower power adapter ...

Can I use Dell G15 5520 12th generation power adapter for my laptop computer? If both of your power adapters are 240w, then yes, you can use the previous power adapter. If the new ...

Any returned computer that is damaged through customer misuse, is missing parts, or is in unsellable condition due to customer tampering will result in the customer being charged a higher restocking fee ...

Any returned computer that is damaged through customer misuse, is missing ...

The Zephyrus G15 requires a minimum of 65W of power to charge efficiently, so you'll need a USB-C charger that can provide at least that much power. Additionally, the charger should ...
