Using the Multiple Stream Framework (MSF) lenses, we analyse how and why the issue of urban heat is currently being prioritized in Jakarta and how the provision of green open space ...

Solar thermal storage systems are having a "glow-up" in 2025 - and we're here to break down Jakarta solar thermal storage system prices without putting you to sleep with technical jargon.

outhern Indonesia is expected to experience extreme heat until the end of the year, as both minimal cloud cover over the islands and the ongoing pancaroba (the transitional period ...

This study presents an in-depth analysis of Land Surface Temperature (LST) trends in the DKI Jakarta region using Landsat satellite imagery spanning from Januar

Because there are many influencing factors of solar radiation in urban areas, detailed potential modeling with high temporal and spatial resolution is needed to better understand the ...

The level of ambient temperature in the location of the solar power plants of Setjen KESDM was higher than the standard conditions, as shown in Table 4, so that the real energy production could...

This study explores the synergistic application of external shading systems and solar control films as a dual strategy to optimize thermal comfort and daylight performance in high-rise ...

This study focuses on Jakarta, Indonesia's capital, which has rapidly urbanized in recent decades. By examining changes in urban density and LST using satellite imagery, we aim to uncover ...

Several studies have demonstrated Indonesia's significant potential for renewable energy sources such as solar, wind, hydro, bioenergy, and geothermal.
