Reliable Environmental and Mechanical Test Equipment Manufacturer. We provide best quality and service for Environmental and Mechanical test equipment. We always work closely and ...

Our climate controlled storage cabinets deliver stable temperature and humidity, so rubber, polymer, and composite materials age slower, inspections pass more often, and field crews stay ready.

The Battery Aging Cabinet provides stable temperature and humidity conditions to perform charge-discharge cycling tests on the battery packs, evaluating their performance degradation.

The lineup consists of six models, with two size variations, 105 liters and 206 liters, and four temperature/humidity ranges, to accommodate your needs.

Constant climate chambers are available in different sizes and with different temperature and humidity ranges. Before purchasing, you need to consider in detail the applications for which you need the unit.

High performance and reliability come in a compact package, for a wide range of temperature/humidity testing needs. Continuous improvement in the design of constant-temperature (and humidity) ...

Air is evenly distributed from the top through louvered windows and diffusers, dispersing the temperature and humidity conditioned in the mixing chamber into the test space. This effectively ensures uniform ...

These specialized cabinets are engineered to house lithium ion batteries in a controlled environment, providing optimal conditions for battery performance and longevity.

Simulate various temperature and humidity environments to test the performance of batteries under these conditions, and evaluate the safety and reliability of batteries under various extreme conditions.
