What is Japan's first energy storage project?

In 2015, we started Japan's first demonstration project covering energy storage connected to the power grid in the Koshikishima, Satsumasendai City, Kagoshima. This project is still operating in a stable manner today. One feature of our grid energy storage system is that it utilizes reused batteries from EVs.

When did Hitachi start delivering a grid energy storage system?

Operations officially commenced on August 1. This project marks Hitachi's first delivery of a grid energy storage system in Japan. The entire process—from design and procurement to installation and testing—was seamlessly managed as a "One Hitachi" initiative, leveraging the comprehensive capabilities of the Hitachi Group.

How big is Japan's energy storage capacity?

Global energy storage capacity was estimated to have reached 36,735MW by the end of 2022 and is forecasted to grow to 353,880MW by 2030. Japan had 1,671MW of capacity in 2022 and this is expected to rise to 10,074MW by 2030. Listed below are the five largest energy storage projects by capacity in Japan, according to GlobalData's power database.

What is GS Yuasa-Kita Toyotomi substation - battery energy storage system?

The GS Yuasa-Kita Toyotomi Substation - Battery Energy Storage System is a 240,000kW lithium-ion battery energy storage project located in Toyotomi-cho, Teshio-gun, Hokkaido, Japan. The rated storage capacity of the project is 720,000kWh. The electro-chemical battery storage project uses lithium-ion battery storage technology.

The GS Yuasa-Kita Toyotomi Substation - Battery Energy Storage System is a 240,000kW lithium-ion battery energy storage project located in Toyotomi-cho, Teshio-gun, ...

TOKYO, Japan - November 29, 2024 - ORIX Corporation ("ORIX") announced today that it will begin commercial operation of the Kinokawa Energy Storage Plant in Kinokawa, Wakayama that was ...

Pacifico Energy started commercial operation of Japan's First Market bidding large scale Energy Storage Systems (ESS) in Kyushu and Hokkaido.

Japan's cabinet energy storage system factory is in operation

The Battery Energy Storage System will begin commercial operation in spring 2025.

In 2024, we plan to invest our accumulated know-how into the operation of the first large-scale energy storage plant in Japan, to be located in Chitose, Hokkaido.

The growth in installed and planned renewable energy generation capacity has driven developers and utilities to evaluate energy storage as a potential solution to intermittency challenges for grid ...

Ever wondered how Japan keeps its neon lights blazing through typhoon season? Enter the Japanese cabinet-type energy storage cabin - a game-changer that's turning heads from Tokyo ...

"Energy storage is expected to play a critical role in stabilising the grid and integrating more renewable energy sources into the power mix."

This project marks Hitachi's first delivery of a grid energy storage system in Japan. The entire process--from design and procurement to installation and testing--was seamlessly managed as ...

Despite strong policy signals, Japan's energy storage rollout faces deep structural headwinds. The nation's split-grid architecture--50 Hz in the east and 60 Hz in the west--limits ...
