Listed below are the five largest energy storage projects by capacity in the US, according to GlobalData's power database. GlobalData uses proprietary data and analytics to provide a ...

Discover the largest battery storage projects in the U.S. for 2025, including Darden, Bellefield, and Swiftsure.

Interactive map of battery storage projects in the US. View the largest projects, track new developments, and explore capacity data across all states.

Accelerated by DOE initiatives, multiple tax credits under the Bipartisan Infrastructure Law and Inflation Reduction Act, and decarbonization goals across the public and private sectors, energy storage will ...

Developers expect to bring more than 300 utility-scale battery storage projects on line in the United States by 2025, and around 50% of the planned capacity installations will be in Texas.

In the second quarter of 2024, US developers put into operation 33 energy storage projects in 10 states with an installed capacity of 2.9GW. The cumulative installed capacity of energy ...

The U.S. has 431 operational battery energy storage projects, 8 using lead-acid, lithium-ion, nickel-based, sodium-based, and flow batteries. 10 These projects totaled 27 GW of rated power in 2024, 8 ...

In the United States, 67 new PSH projects are planned across 21 states, representing over 50 GW of new storage capacity. The future of energy is one where reliability, sustainability, and resilience are ...

Explore the top 25 BESS projects in the US and uncover the key players driving America's energy storage boom.

Utility-scale battery storage in the United States is poised to more than double over the next two years and will

Large-scale energy storage projects in the united states

close out 2026 at nearly 65 GW -- a rapid rise from 17 GW in the first quarter...
