How can the European Commission boost the wind power industry?

The European Commission has presented actions to boost the European wind power industry. To achieve the EU target that requires 42.5% of EU energy to be renewable by 2030, we will need a massive increase in wind installed capacity. This action plan will ensure that wind power continues to be a European success story.

What is the EU wind power package?

To accelerate wind energy manufacturing across Europe, the Commission presented the EU Wind Power Package in October 2023. It consists of 2 initiatives - the European Wind Power Action Plan and a communication on achieving the EU's offshore wind ambitions.

What is the European wind power action plan?

It consists of 2 initiatives - the European Wind Power Action Plan and a communication on achieving the EU's offshore wind ambitions. As the Action Plan states that the EU should double the share of renewables in its energy consumption by 2030, it is critical to provide the renewable energy industry with stable and long-term investment signals.

Can wind power be a European success story?

To achieve the EU target that requires 42.5% of EU energy to be renewable by 2030, we will need a massive increase in wind installed capacity. This action plan will ensure that wind power continues to be a European success story. Together, the Commission, the Member States and industry will act in six main areas:

To address them, on 24 October the European Commission announced its new Wind Power Action Plan, aimed at maintaining a healthy and competitive wind energy supply chain, with a ...
