Will Madrid become a central base for energy storage systems?

"Our strategy is very clear: to turn Madrid into our central base for energy storage systems. From there, we'll provide agile and specialized support to clients across Europe and Latin America," Gattoni explained.

When is energy storage in Madrid 2024?

So join us in Madrid on the 24th of October 2024. The combination of favorable policies, technological advancement, and substantial market potential signals a prime opportunity to lead in the energy storage space. Capitalize on this moment to not only drive your company's growth but also to solidify its role in a sustainable future

How many datacentres are there in Madrid?

The Madrid datacentre market is one of the largest in Spain, accounting for more than 60% of capacity in 2023. Currently, the city has 18 server farms operated by 16 providers. The scheme will consist of three standalone projects: a 390MW solar farm at Pradillos, a 291MW facility at Fuencarral and a third at Loeches with a maximum output of 260MW.

How many solar power plants does Edisun own?

Edisun, which is listed on the Swiss stock exchange, owns 36 solar power plants in Switzerland, Germany, Spain, France, Italy and Portugal. It has some 1.2GW of projects under development. Further reading:

Building on Envision's global success in pioneering the world's first-of-its-kind net zero industrial parks, the facility will be powered by locally generated clean energy, including biomass, ...

Hosted in Espacio KOI, a venue known for sustainability and efficiency, our conference will delve into the following key topics: grid integration, business models, revenue streams, markets (capacity, ...
