What is Axens & Minmetals new energy materials (China)?

The project began with the signing of an exclusive partnership with Minmetals New Energy Materials (China) in September 2023. Axens continues advancing its industrial energy transition ambitions through the production of battery materials.

What makes China Minmetals Corporation a good company?

Since 2025, China Minmetals Corporation has followed the overall deployment of "stable growth, innovation, strong industry, reform promotion, risk prevention, safety assurance, and strong Party building";

What's going on with Axens & Minmetals?

As part of the Macaron project in Saint-Saulve (Nord region, France), French industrialist Axens and its Chinese counterpart Minmetals New Energy Materials have signed a memorandum of understanding setting out the operation and governance principles for the joint venture on the sidelines of the Choose France Summit.

This energy storage technology, characterized by its ability to store flowing electric current and generate a magnetic field for energy storage, represents a cutting-edge solution in the field of energy storage.

In the project, it applies over twenty green and low-carbon technologies, such as Photovoltaic, Energy Storage, Direct Current, Flexibility (PEDF), smart operation and maintenance, ...

Breakthroughs were made in key technologies, equipment, and engineering applications, including silicon-based materials, nickel matte anode plates, low-carbon sintering, scandium-based ...

[Minmetals New Energy's Ultra-High Nickel Ternary Material Passes Multiple High-End Customer Project Tests] Minmetals New Energy stated on the interactive platform that the company's ultra-high ...

The joint venture agreement between China Minmetals Corp and Qinghai province to tap major salt lake resources marks a critical step in advancing China's lithium resource development, ...

Minmetals group energy storage project

China Minmetals launches a five-year strategic plan to dominate critical minerals technology, signaling a national mission for technological leadership.

In the first half of 2025, ultra-high-nickel products for power batteries (supplied to leading industry customers) and drones entered the phase of batch stability verification; simultaneously, the ...

The project began with the signing of an exclusive partnership with Minmetals New Energy Materials (China) in September 2023. Axens continues advancing its industrial energy transition ...

Before the meeting, the delegation visited the construction site of the Jiasheng vanadium liquid flow energy storage battery project and the Kaixuan Yusheng and Chenshuo lithium batteries, and ...

Explore cutting-edge energy storage solutions in grid-connected systems. Learn how advanced battery technologies and energy management systems are transforming renewable energy infrastructure. ...
