China's state-owned power generation enterprise Datang Group said on June 30 that it had connected to the grid a 50 MW/100 MWh project in Qianjiang, Hubei Province, making it the world's ...

Peak Energy's sodium-ion phosphate pyrophosphate (NFPP) battery storage system was unveiled in July and is now running at the Solar Technology Acceleration Center (SolarTac) in ...

Under the phased contract, Peak Energy will deliver approximately 720 MWh in 2027, which will become the largest single deployment of sodium-ion battery systems announced to date. ...

The company delivered sodium-ion energy storage cells in bulk to China Southern Power Grid at the end of 2023, and the world's first 10-MWh sodium-ion battery energy storage station using ...

Under its agreement with Texas-based energy provider Jupiter Power, Peak Energy will provide 4.75 gigawatt-hours of sodium-ion battery energy storage systems (ESS) for deployment between...

By the end of 2023, it successfully delivered batches of storage cells to China Southern Power Grid, connecting the first 10 MWh sodium-ion power plant in May this year. The ...

Peak Energy designs and deploys next-gen sodium-ion energy storage that is safer, lower-cost, and more reliable. Our systems remove legacy failure points and enable rapid grid growth to meet the ...

The second biggest battery producer in the world, BYD, has successfully created a sodium-ion battery pack that meets all the needs of a grid-level battery energy storage system ...

With products like the first high-performance Na-ion battery for grid energy storage, it will now reap the benefits of that decision when the plant becomes operational.

Mw-class sodium-ion battery energy storage pack delivered

Peak Energy's solution is the first battery energy storage system to remove nearly all moving parts with new patent-pending technology, driving significant cost-savings.
