What does Nordic batteries do?

We develop battery modules, racks and energy storage systems designed to power industrial applications across challenging sectors, including construction, maritime, defence, and grid systems. At Nordic Batteries we focus on what is important: safety, reliability and performance.

Are Nordic batteries looking for a development engineer?

Nordic Batteries are seeking a development engineer for mechanical construction and system design. Factor 47 is operative! The pilot line where Nordic Batteries will produce their first battery modules is now officially open after the visit from former Prime Minister Erna Solberg where she cut the banner to kick it off.

What is HST Nordic's EPC process?

From first site walk to grid connection and beyond, HST Nordic's EPC process is designed to support your energy project every step of the way. We collaborate with developers, IPPs, or industrial clients from the earliest stages--offering technical input on land feasibility, grid proximity, and constructability.

What services do we provide in the Nordics?

We provide services throughout the Nordics. We provide installations for several energy companies as a subcontractor. Thanks to our wide experience, we are able to respond to the changing needs of energy companies. We provide installations of medium voltage switchgear and earth fault compensation units for power plants.

We specialize in large-scale energy storage systems, mobile power stations, distributed generation, microgrids, containerized energy storage, photovoltaic projects, photovoltaic products, solar industry ...

Nordic Semiconductor, a global leader in low power wireless connectivity solutions, today announced the launch of the nRF54LM20A, the latest addition to its next-generation nRF54L Series of ultra-low ...

Nordic Semiconductor, the global leader in ultra-low-power wireless connectivity solutions, today announced its acquisition of the intellectual property and core technology assets of Neuton.AI, a ...

The Nordic Gravity Energy Storage Power Station Project stands at the forefront of sustainable energy

Nordic energy storage power station installation engineering company

innovation. By leveraging natural geography and simple physics, it offers a scalable solution to ...

We design, build and maintain BESS in Finland and the Baltic countries. We specialise in the construction and maintenance of large, industrial-scale battery energy storage systems. We deliver ...

Haapajärvi, September 26, 2025 - NEPower and Alpiq have expanded their cooperation to build Finland's largest (125 MW / 250 MWh) energy storage project. Under the newly signed agreement, ...

Nordic Semiconductor, a global leader in low-power wireless connectivity solutions, is bringing AI intelligence and functionality to the smallest battery-powered IoT devices.

We develop battery modules, racks and energy storage systems designed to power industrial applications across challenging sectors, including construction, maritime, defence, and grid systems. ...

Our comprehensive suite of engineering services and solutions, span from design excellence to products and grid services. Discover how we can support and elevate your project to new heights.

Nordic delivers world-class hardware, embedded software, development tools, power management, world-class support, and cloud lifecycle services - all simplifying development for developers to build ...
