What is an outdoor telecom enclosure?

Our outdoor telecom enclosures support a wide range of telecommunications and infrastructure needs: Fiber Optic Networks: From compact fiber distribution units to high-capacity data center enclosures like the AP-Data with six slack frames, our cabinets manage dark-fiber volumes with organized cable management and secure slack storage.

What are outdoor Telecom cabinets?

Our outdoor telecom cabinets are designed to protect your sensitive network equipment from harsh environments where equipment may be exposed to dust or water. For added protection, there is a water and dust proof polyurethane door joint strip.

What is a telecom shelter?

Telecom shelters typically house and protect communications equipment such as radio equipment and fiber optics, keeping networks online and communications free of interruption. They are also used to provide shelter and protection for data equipment, power systems, generators, lighting, fire suppression, cable entry, HVAC, racking, and more.

What is a minifort & small telco enclosure?

Compact Network Deployments: The MiniFort and Small Telco enclosures provide secure termination and equipment housing for smaller installations, requiring pole, ground, or wall mounting with minimal footprint. Flexibility defines every telecom cabinet we manufacture.

Module X Solutions designs, engineers and manufactures modular and build on site precast or lightweight steel telecommunication equipment shelters to industry and client specific requirements.

Westell offers secure, weather-tight outdoor network enclosures to protect electronic equipment for outdoor telecom networks.

Explore AZE's premium NEMA-rated and weatherproof enclosures designed for telecom, industrial electrical,
