230 V Input, 230 V Output I Installer/User Guide The information contained in this document is subject to change without not.

This user manual contains guidelines to check delivery, installing and commissioning of the UPS and is intended for people who plan the installation, install, commission and use or service the UPS.

Do not start the UPS until after the installation is finished, the system is commissioned by an authorized engineer, and the external-input circuit breakers are closed.

The UPS system is housed in a single, free-standing cabinet with safety shields behind the door for hazardous voltage protection. The cabinet matches the battery and distribution cabinets in style and ...

GVSUPS20KFS - Galaxy VS UPS 20kW 208V for External Batteries, Start-up 5x8.

These two input line are bridged by default but the connection can be easily removed obtaining two independent input lines during installation or commissioning.

The UPS system is housed in single freestanding cabinets. The cabinets line up and match in style and colour, and have safety shields behind the doors for hazardous voltage protection.

IP 20; protection against medium sized foreign matter (incl. finger), no protection against vertically dripping water.

8. Communication and user interface The TRIMOD MCS 20 UPS is equipped with a very simple and intuitive display; the UPS sets up a real time monitoring of all the data concerning operating ...

2 controls signals (External CAN Network, Bypass Pull-Chain) are required for external paralleling. Both of
