How much does a 10kW Solar System cost in Australia?

According to Solar Choice's own data, the average 10kW solar system price in Australia as of July 2025 is about \$0.91 per watt- or about \$9,130 after the federal STC rebate is deducted. The below table shows the breakdown of the average costs by each major state capital in Australia, which we update every month:

How long does a 10kW Solar System last in Australia?

The payback period for a 10kW solar system in Australia is typically 4-5 years. This depends on your self-consumption rate and solar feed-in tariff. A solar system can pay for itself faster if you consume more of the energy on-site (daytime usage), rather than exporting excess to the grid.

Should you invest in a 10kW solar battery storage system?

For those who already have solar panels or are considering a full solar power setup, investing in a 10kW battery storage system can significantly enhance energy performance and long-term value. What Is a 10kW Solar Battery? A 10kW solar battery refers to an energy storage system capable of delivering 10 kilowatts of power output.

Should I install a 10kwh solar battery in Australia?

Installing a 10kWh solar battery in Australia is a smart investment. It helps reduce your electricity bills and increases energy independence. However, the initial solar battery price can be significant. Fortunately, a mix of federal and state incentives can help lower the total solar battery cost. Federal Rebate
