How much does a solar panel cost in London?

It typically costs £766 to buy and install a 350-watt solar panel in London. That means a typical three-bedroom household will pay £7,659 for an array with 10 solar panels. To find out more about the kind of prices you're looking at, check out our Solar Panel Costs guide. Are there any solar panel grants from local councils in London?

How to choose a solar system installation company in East London?

Make sure you find solar system experts in East London that have highly competent technicians who know how to get the job done. You should also be prepared to wait a few weeks before the installation company in East London is able to help you. Solar systems are in high demand these days and the companies can get extremely busy.

Can you save money with solar systems in East London?

Yes, you can save a lot of money with solar systems in East London. Initially, you have to drop a couple of thousands to get the system installed, especially if it needs to power your entire property. However, it becomes cost-effective in the end when you don't have a massive electricity bill and you're not affected by load-shedding in East London.

Are solar panels a good option for Londoners?

Whether you're closer to the Thames or the M25, if you're fortunate enough to live in London and you're looking to cut your electricity bills, solar panels could be the best way forward. From Hillingdon to North Ockendon, the capital gets more sunlight than most areas of the UK, which gives Londoners with solar panels a substantial advantage.

In this comprehensive guide, we'll break down solar panel costs in London for 2025, helping you understand exactly what to expect when investing in a solar panel system.
