What is a magnadc programmable DC power supply?

All MagnaDC programmable DC power supplies utilize high-frequency IGBT- and MOSFET-based power processing in a current-fed topology. This topology adds an additional stage over the conventional voltage-fed topology for enhanced control and system protection, ensuring that even under a fault condition, the power supply will self-protect.

Why should you choose Magna-power power supplies?

These magnetic components, in combination with equally loaded, high-power DC power supplies, offer a cost-effective solution to maintaining power quality at acceptable levels, enabling applications to benefit from Magna-Power's reliable high-frequency switch-mode power supplies, extended into multi-megawatts.

What interfaces are available for magnadc power supplies?

MagnaDC power supplies include RS232 communication interface standard with optional LXI TCP/IP Ethernet (+LXI) and IEEE-488 GPIB (+GPIB) options. SCPI Command Listing Using the rear User 37-pin I/O connector, the MagnaDC power supplies can be completely controlled and monitored using external signals.

Shop our power supply cabinets for reliable and efficient power distribution. Perfect for indoor and outdoor applications. Bulk orders and OEM available.

1) Before the distributor can quote you a price on an equivalent pump, a sales engineer has to identify all the specifications of the existing unit, such as shaft, mounting, ports and displacement, ...

ICEENG CABINET serves customers in 18+ countries across Africa, providing outdoor communication cabinets, power equipment enclosures, and battery energy storage cabinets for telecommunications, ...
