---

Romania has taken another bold step in expanding its battery storage fleet with the launch of a EUR150 million program for municipalities, set to add 385 MW of new battery capacity to the ...

Bucharest, July 22, 2025 - Nova Power & Gas, a Romanian energy company and part of the E-INFRA Group, announces the launch of the largest battery energy storage project in Romania.

This project in Romania is a testament to the critical role that battery energy storage will play in the future of energy, creating a more resilient, efficient, and sustainable power grid for ...

In April, Romania's largest battery storage system, of 24 MWh, was put into operation. It is the first phase of a project totaling 216 MWh. The facility is connected to the Mireasa wind farm of 50 ...

Romania's solar and storage market is stronger than ever -- but also more mature. Developers who invest in technical accuracy, grid foresight and hybrid asset design will lead the next ...

As Romania accelerates its transition to renewable energy, new energy storage projects are taking center stage in 2024. This article explores the latest advancements, government initiatives, and ...

As a key element of the global energy transition, energy storage has become the next frontier. This enables the integration of renewable sources and ensures grid stability.

In an accelerated wave of investments, companies in Romania are combining battery energy storage systems (BESS) with solar, hydro or wind energy, or building independent storage facilities.

The largest battery energy storage system (BESS) to date in Romania, with a capacity of 200 MW/400 MWh, has been commissioned in Cluj County by the private investor Nova Power & Gas.
