The plant will be integrated with the PIONEER project, a 10 MWh second-life Battery Energy Storage System (BESS) that will store excess solar power to use at night, helping keep the ...

Enel X and Aeroporti di Roma will design an innovative storage system that will allow, through used electric vehicle batteries, for the storage of excess energy produced by a solar plant, ...

Built by Enel and Aeroporti di Roma with the scientific support of the Fraunhofer Institute, Pioneer is the largest energy storage system in Italy based on second-life batteries, and one of the ...

The inauguration of the largest energy storage facility using second-life batteries in Italy marks a turning point in the decarbonization of the Fiumicino airport hub.

Developed by Italian utility Enel and airport operator Aeroporti di Roma (ADR), the 10 MWh battery energy storage system (BESS) strengthens the airport's energy autonomy and reduces ...

Italy's largest energy storage system based on used batteries for electric vehicles was inaugurated on Tuesday at Rome's Fiumicino airport to help it reduce carbon emissions.

Governor Hochul announced awards for 22 large-scale solar and energy storage projects that will deliver enough clean, affordable energy to power over 620,000 New York homes for at least 20 years.

Using Rome Airport as an example, the planned 2nd-life battery storage in combination with a PV system shows the way towards the goal of net-zero emissions in the local power supply. In addition, ...

The project will be developed at Rome Fiumicino International airport and the energy stored will cover evening peak-demand, while also providing flexibility services to the grid.

Rome energy storage power station project

Inaugurated on June 3, 2025, at Rome Fiumicino Airport, PIONEER is an energy storage system based on repurposed EV batteries.
