How big is Saudi Arabia's power generation market?

According to Mordor Intelligence, the Saudi Arabia power generation market is expected to grow from 83 gigawatt in 2023 to 110.03 gigawatt by 2028, at a CAGR of 5.80% during the forecast period (2023-2028). The Ministry of Energy's spending on power and renewable energy projects is expected to reach \$293 billion by 2030.

What type of energy is used in Saudi Arabia?

In the Kingdom of Saudi Arabia (KSA), power plants mostly use oil and gas. Crude oil is also used in combined-cycle power plants. The combustion of fossil fuels has environmental emissions. Plans indicate the installation of renewable power plants or nuclear power plants. Both categories have no environmental emissions.

Who are the major players in Saudi Electricity Market?

Some of the major players operating in this market (in no particular order) include ACWA Power Co., Saudi Electricity Company (SEC) SJSC, MARAFIQ Power and Water Utility Company for Jubail and Yanbu (MARAFIQ), Arabian Electrical Transmission Line Construction Company (AETCON), and Nour Energy (ASTRA Group), among others.

What will Saudi Arabia do in the future?

In addition, Saudi Arabia plans to develop over 58 GW of solar and wind power, and subsequently phase out all power stations that use petroleum and diesel. Saudi Arabia also plans to replace its outdated transmission and distribution infrastructure with smart grid technology, and to promote international grid connectivity.

A smart, greener future for Saudi Arabia also awaits as more significant projects are underway. In December, Saudi Arabian electric utility company and NEOM subsidiary ENOWA unveiled a ...
