Work has started at Changi Airport on the largest single-site rooftop solar panel system in Singapore. (Photo: Changi Airport Group)

A new solar photovoltaic (PV) system is to be installed on the rooftop areas of Singapore Changi's terminal buildings, terminal auxiliary structures, airfield and cargo buildings.

Changi Airport Group (CAG) has partnered with Keppel Ltd. to develop a major solar photovoltaic (PV) system across the rooftops of Changi Airport's terminal buildings.

Changi Airport Group (CAG) has appointed Keppel Ltd. (Keppel), to design, build, own and operate a large-scale solar photovoltaic (PV) system on the rooftop areas of Changi Airport's ...

Changi Airport is set to establish the largest single-site rooftop solar panel system, contributing significantly to sustainable energy initiatives. The project aligns with Singapore's ...

When completed in early 2025, it will be Singapore's largest rooftop solar PV system in a single location, airport operator CAG and asset manager Keppel announced on Feb 14.

These systems will be installed on 40,000 m<sup>2</sup> of turf outside the aircraft operations area at Changi Airport. Once operational, the rooftop and airfield PV systems are expected to generate ...

This ambitious solar energy project at Changi Airport underscores Singapore's dedication to sustainability and serves as a pioneering example of integrating renewable energy solutions within ...

Spanning a duration of 25 years, this initiative aims to culminate in Singapore's largest single-site rooftop solar PV system, with an anticipated completion date set for early 2025.
