A sodium-ion battery works much like a lithium-ion one: It stores and releases energy by shuttling ions between two electrodes.

The Blue Rack is the world's first sodium-ion battery cabinet designed for mission-critical applications such as data centers, peak power-shaving, and other industrial power environments.

The Sodium-Ion Battery Pack for Energy Storage Systems is a flexible and customizable assembly of sodium-ion battery cells, engineered to meet the specific power and capacity requirements of ...

It delivers high safety, excellent thermal stability, and long cycle life -- making it ideal for home energy storage, telecom backup, mobile power cabinets, and off-grid systems.

This advanced system delivers a safe, reliable, and high-performance alternative to traditional lithium-ion batteries. With active liquid cooling and an integrated fire protection system, this cabinet ensures ...

With excellent performance in low and high temperatures, and lower material costs, it is ideal for stationary applications such as grid peak shaving, commercial backup, and renewable energy ...

The sodium-ion battery module is equipped with a PACK-level fire-fighting module as standard, and a cabinet-level fire-fighting system is optional, which is safer and more reliable than the lithium-ion ...

The sodium-ion battery module has self-recovery from failure, real-time battery cell equalization function, and provides protection functions such as overvoltage, undervoltage, overcurrent, short-circuit, and ...

Discover our range of rack-mounted battery systems designed for maximum efficiency and space optimization. Ideal for data centers and industrial applications, providing reliable power storage.

Sodium ion battery pack energy storage cabinet

Scalable from Kw to multi-MW, the BlueRack(TM) 250 battery cabinet is a safe, high-powered solution you can count on. By employing breakthrough sodium-ion cells based on Prussian blue electrodes, the ...
