Rogue communication devices have been discovered in Chinese made solar inverters, devices which play a "critical role" in renewable energy infrastructure, Reuters reports. This has ...

The combination of solar modules, advanced batteries, inverters, and automatic switching creates a resilient emergency power system for telecom cabinets. This integration supports ...

U.S. energy officials have launched an investigation after discovering unauthorized communication equipment embedded within Chinese-manufactured solar power inverters connected ...

For months, experts examining renewable energy equipment imported from China have been quietly finding rogue components in solar inverters and large batteries, two people familiar with the...

LONDON, May 14 (Reuters) - U.S. energy officials are reassessing the risk posed by Chinese-made devices that play a critical role in renewable energy infrastructure after unexplained...

U.S. energy officials are reportedly reassessing the security risks posed by Chinese-made components in renewable energy infrastructure after discovering hidden communication ...

In May 2025, Reuters disclosed that Chinese-made solar inverters were being delivered with undocumented cellular radios --SIM-card slots and RF circuitry secretly soldered onto their ...

Investigations have revealed that certain Chinese-made solar inverters and batteries contain undocumented communication modules, including cellular-like mechanisms.

U.S. energy-sector forensic teams have begun disassembling Chinese-manufactured solar inverters and grid-scale batteries after discovering undocumented 4G/LTE modules and other ...
