Does South Sudan rely on imported food & fuel?

The magnitude of the effect and its gradual nature are consistent with South Sudan's heavy reliance on imported food and imported (processed) fuel and a plausible lag in the responsiveness of retail prices to rising import costs.

Is the Red Sea crisis affecting South Sudan oil exports?

A potential flaring up of the Red Sea crisis that has disrupted commercial shipping in recent months and has led to an increase in maritime rates, poses substantial risks for South Sudan oil exports.

How has the oil pipeline impacted South Sudan's external and fiscal accounts?

Delays in the repair of the oil pipeline have reduced oil exports since mid-February 2024 to about one-third of their previous level. This has exerted pressure on South Sudan's external and fiscal accounts given that oil exports account for nearly 90 percent of fiscal revenues and 95 percent of exports.

Does South Sudan have a capacity development program?

Capacity development (CD) activities in South Sudan increased significantly under the first Staff Monitored Program (SMP). South Sudan formally joined AFRITAC East in May 2020. Since then, AFRITAC East has provided additional technical assistance and CD assessments.

Located in Sudan, this project addresses the region's inadequate grid supply by implementing an integrated "photovoltaic + energy storage" solution to provide clients with stable, clean power.

Historical Data and Forecast of South Sudan Energy Storage Market Revenues & Volume By Industrial for the Period 2021- 2031 South Sudan Energy Storage Import Export Trade Statistics

Countries that rely heavily on imported energy may be vulnerable to supply disruption from external events such as the Covid-19 pandemic and the war in Ukraine. In countries that export ...

A just-commissioned solar and battery storage system will reduce diesel consumption by at least 80% at a base for 300 humanitarian workers in South Sudan, managed by the UN's International ...

Ezra Group, a South Sudan family-run conglomerate, on Monday announced the launch of a 20-MW solar

power plant with a 14-MWh battery energy storage system in South ...

Sudan and South Sudan, situated in east Africa, became independent in July 2011 after a referendum in Southern Sudan. South Sudan is situated in equatorial Africa and has no access to the ...

With rising demand for reliable electricity and ambitious renewable energy goals, grid-connected energy storage systems are emerging as a game-changer. This article explores how these systems can ...

Key Figures & Findings: South Sudan is embarking on a significant renewable energy transformation, with a new solar-plus-battery storage (BESS) project to address the country's alarmingly low energy ...

Find relevant information for South Sudan on energy access (access to electricity, access to clean cooking, renewable energy and energy efficiency) on the Tracking SDG7 homepage.

The Sudan war is exacerbating an already dire humanitarian situation and has delayed the repair of the oil pipeline that transports South Sudan's crude oil to export markets causing a ...
