What is the major solar projects list?

The Major Solar Projects List is a database of all ground-mounted solar projects, 1 MW and above, that are either operating, under construction or under development. The list is for informational purposes only, reflecting projects and completed milestones in the public domain.

Where can I find a list of major solar project data?

SEIA makes major solar project data available to the public through the map below. SEIA members have exclusive access to the list as a sortable, searchable MS Excel file that is updated monthly.

Where is Capital Power located?

Capital Power's head office is located within the traditional and contemporary home of many Indigenous Peoples of the Treaty 6 Territory and Métis Nation of Alberta Region 4. We acknowledge the diverse Indigenous communities that are located in these areas and whose presence continues to enrich the community.

How much power does Capital Power own?

Capital Power owns approximately 7,500 MW of power generation capacity at 29 facilities across North America. Projects in advanced development include approximately 151 MW of owned renewable generation capacity in Alberta and 512 MW of incremental natural gas combined cycle capacity, from the repowering of Genesee 1 and 2 in Alberta.

Capitol Solar Experts is a leading solar service company. We have over 8 years of experience and our team takes pride in providing high quality solar at affordable prices.
