Over the medium term of two to three years, he said the company has planned to develop value-added projects such as floating solar and energy storage systems and enhance project efficiency.

With abundant hydropower resources and growing demand for grid stability, energy storage solutions are becoming critical. This article explores how many energy storage power stations exist in Laos ...

EDF (Electricit  de France), in partnership with the Government of Laos, has taken a major step towards Southeast Asia's decarbonisation by signing a memorandum of understanding ...

On 1 September 2025, Electricit  du Laos Generation Public Company (EDL-Gen) signed an agreement with private firms from Singapore to develop a pumped-storage hydropower (PSH) project in Sekong ...

Together with the Government of Laos, EDF signed a memorandum of understanding to undertake the feasibility studies for a Pumped Storage Hydropower project located nearby Nam Theun 2, with an ...

Laos is exploring hydrogen storage using excess hydropower. Pilot projects aim to produce "blue-green hydrogen" (a hybrid using both water and biomass) - potentially creating a new ...

In a determined push to secure energy stability, Laos is intensifying efforts to expand its electricity infrastructure through ambitious hydropower and solar projects.

The new Regional Electricity Access and Battery-Energy Storage Technologies (BEST) Project -approved by the World Bank Group today for a total amount of \$465 million-- will increase ...

China's invested \$1.2 billion in Laos' energy sector since 2020, focusing on cloud-connected storage systems. The Huijue Group recently deployed modular BESS (Battery Energy Storage ...

The second batch of laos energy storage projects

The Laos Ministry of Energy's tender documents reveal a smart three-phase approach. Phase 1 focuses on lithium-ion battery systems (minimum 4-hour duration), while Phase 2 explores ...
