The Company develops solar and Battery Energy Storage System (BESS) projects that sell electricity to utilities, commercial, industrial, municipal and residential off-takers.

This diverse resource includes energy storage that can provide dispatchable power on intra-day and/or multi-day time-scales, and includes various types of mechanical energy storage, thermal energy ...

NYCIDA closed its largest battery energy storage project to date, the East River Energy Storage Project, located on an industrial site on the East River in Astoria, Queens. When built, the ...

Discover innovative mobile energy storage solutions with Power Edison. Revolutionize utility operations with cutting-edge technology and dynamic power.

Located in Chateaugay, Franklin County, the 20-megawatt facility will be operated by the New York Power Authority and connects to the state's electrical grid. Constructed by Victor-based ...

Smart, affordable, and resilient: New York State is investing in energy storage systems to help modernize the electric grid and reduce carbon emissions.

Bulk energy storage incentives are applicable to ESS projects between 5 and 20 MW in capacity and are available through the New York State Energy Research and Development Authority (NYSERDA).

New York's first state-owned utility-scale battery energy storage project is now operating in the North Country's Franklin County.

Energy storage is essential to a resilient grid and clean energy system. Learn about the types of energy storage, available incentives, and more.

Use new york energy storage mobile power supply

The New York Power Authority (NYPA) is collaborating with Cornell University and the Electric Power Research Institute to demonstrate use of a quieter and no-emission mobile battery to ...
