This 304 SS outdoor energy cabinet is manufactured from premium 304 stainless steel, offering excellent corrosion resistance and strength for demanding outdoor environments.

Built from galvanized or stainless steel materials, the cabinet achieves IP54 to IP65 ingress protection, effectively isolating internal power components from moisture, dust, and corrosion.

Integrated Substations: Pre-installed box-type substations featuring compact structure, quick installation, energy-saving, and environmental protection, suitable for urban power grids, temporary power use, ...

Built with corrosion-resistant materials, advanced thermal management, and customizable designs, these NEMA and IP-rated enclosures are ideal for energy storage, telecom, and industrial use.

Our cabinets are built to withstand harsh weather conditions and provide excellent protection for power management systems, telecom base stations, energy storage battery systems, and radio equipment.

*The energy storage system adopts high-efficiency lithium battery technology, with system round-trip efficiency up to 95%, ensuring maximum energy utilization and reduced operating cost.

With a corrosion-resistant metallic construction and powder-coated finish, this cabinet ensures durability against harsh weather conditions, safeguarding your electronic equipment outdoors.

Ideal for retail stores, restaurants, small factories, telecom base stations, and temporary event sites, these cabinets combine rugged protection (IP54), integrated inverters, and scalable rack ...

NEMA 4: Provides protection against water ingress and dust. NEMA 4X: Adds corrosion resistance, perfect for coastal or industrial environments. Our outdoor telecom cabinets and outdoor telecom ...
